New APM-424(V)5 Software Update Available

This Product Information Letter (PIL) informs current users for all variants of the APM-424(V)5 that a new software version is available as follows:

Software:
Host: 1.6.D(3B)
DSP: 1.6.9(1B)
FPGA: 1.75(5)
CPLD: 1F
Bootloader: 1.0.0(1)

This new software/firmware is certified to 17-1000 Mark XIIB from the DoD International AIMS Program Office.

Includes with this release is a new Windows based Remote Interface GUI. This GUI is ideal for remote diagnostic testing of all transponders and interrogators modes including ADS-B Out. This GUI is available as part of the operations manual CD (86805).

This update is controlled under ITAR regulations and is only available via secure file transfer or under appropriate export licensing. To obtain copy of this new software update, supporting operations manual, and remote GUI, please contact our Technical Assistance Team at techsupport.avcomm@viavisolutions.com or contact VIAVI Customer Service at (001) 800-835-2350.
